

PERMIT VISION

INTEGRATED DIGITAL CONTROL OF WORK SOLUTION

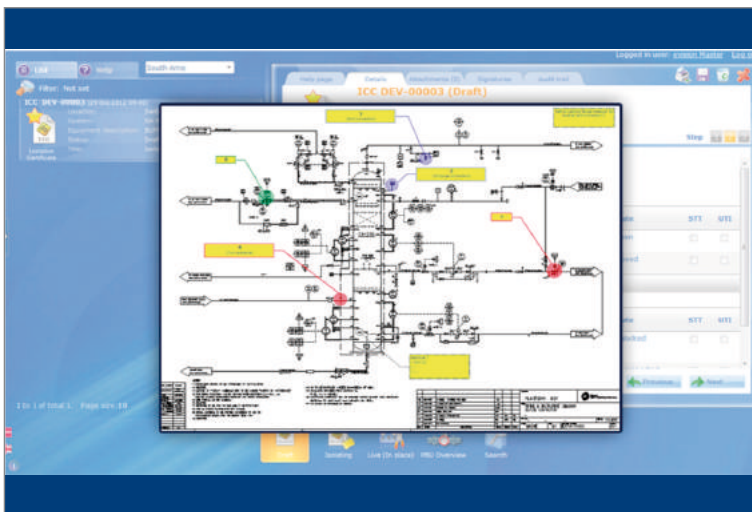

With Permit Vision, you're in control of your frontline operations. In real-time, all the time. Permit Vision brings together your permit to work, risk assessment and isolation management into a single digital system and makes it streamlined, clear, and auditable. Through increased transparency in operational processes, reduced waiting times and empowerment of your teams you will achieve greater workforce efficiency, improve asset utilization and maximize safety.

CONTROLLED

- **PROCEDURES** | The Permit Vision solution can be fully configured to suit your business rules, relevant legislature and regulations
- **COMPLIANCE** | Permit Vision ensures all employees follow the correct processes, ensuring all elements of work are examined and assessed for maximum safety and efficiency
- **OVERSIGHT** | See everything going on across your asset(s) with real-time graphical overviews and integrated conflict detection

CONNECTED

- **FULLY INTEGRATED** | With connected and interdependent permit-to-work, risk assessment and isolation management, Permit Vision offers unprecedented compliance and safety
- **MULTI-SOURCE** | Permit Vision interfaces with numerous external systems, including MMS, DMS and DCS
- **MODULAR** | Expand Permit Vision with various useful modules such as interactive P&ID, Critical Valve Management, Operational Risk Assessment and more, leading the way towards a fully digital plant

CLEAR

- **INTERFACE** | easy to use and consistent interface and workflows ensure optimal adoption by your workforce
- **PRINTOUTS** | Permit Vision offers fully configurable printouts of Permits, ICCs and Risk Assessments, allowing employees to always have the correct information at hand on-site
- **ADVANCED SEARCH** | search archived permits, risk assessments and ICCs with various queries

FAST ROI

POWER YOUR WORKFORCE

More efficient processes lead to a direct increase of productive hours, leading to shorter meantime to repair and increased hands-on tooltime.

STREAMLINE YOUR ASSET

Decrease your maintenance backlog, speed up shutdowns and turnarounds and shorten permit wait times through efficient and consistent processes and templates.

IMPROVE YOUR INSIGHT

Powerful graphical overviews, deep-level audits and optional KPI dashboards allow management to drill down into detailed information, discover bottlenecks and analyze trends.

INCREASE SAFETY AND EFFICIENCY

END-TO-END CONTROL OF WORK SYSTEM

Whether for a single site or a full enterprise-wide international rollout, Permit Vision is a scalable solution for your Control of Work challenges. eVision integrates PTW, risk assessment and Isolation management into one connected, modular ecosystem with Permit Vision. The integration and realization of these processes builds greater safety, organizational efficiency and effectiveness. eVision offers full support in your transition to digital control of work, helping you achieve operational excellence.

PTW

- Consistent and streamlined workflow based on your procedures
- Active conflict detection
- Integrated lessons learned for real-time awareness
- Stringent processes ensure compliance

RISK

- Ensure correct risk assessments for jobs being done
- Task Risk Assessment gives total insight into hazards and controls
- Configurable Risk Assessment printouts on-site
- "Affected areas" shows risk in adjacent locations

LOTO

- Build ICCs from scratch, MMS, or templates
- Attachment of P&IDs directly to the ICC
- Isolation conflict detection fully integrated
- Print scannable isolation tags

EXPAND YOUR CONTROL

Enhance the Permit Vision system for even more insight.

eVision integrates various modules to offer your organisation complete control, including:

LOLC

- Critical Valve management
- Live valve state
- Integration with P&IDs

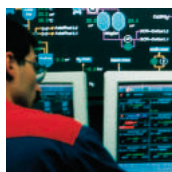

REPORT VISION

- Enterprise-wide configurable reporting
- Ad-hoc data exploration
- Visual trend overviews

TEMPLATE MODULE

- Manage all your templates
- ICC/TRA/PTW fully supported
- Greatly increase productivity

SMART VISION

- Realtime business intelligence
- Data Cube analysis
- KPI dashboard
